Peter Blanken & Michael Burry:

LJ v LS CEO Req for Invest Info: Peter Blanken & Michael Burry.

Peter Blanken: I have been in a few situations recently where people I respect and love have given me their opinion on certain matters. I have also had the dubious pleasure of listening to less-than-credible “specialists” mouth-fart about subjects they in actuality did not know a lot about. The greatest tragedy of mankind — or one of them — is that people needlessly hold wrong opinions in their minds. All opinions are not equal. And it is not the person we love or respect who necessarily has an opinion which really counts, at least not if they lack believability. Ray Dalio defines believability as follows: “Believable people as those who have repeatedly and successfully accomplished the thing in question — who have a strong track record with at least three successes — and have great explanations of their approach when probed”. From this he extracts another very valuable thought which many people who argue for the sake of arguing would do better to consider: “If both parties are peers, it’s appropriate to argue. But if one person is clearly more knowledgeable than the other, it is preferable for the less knowledgeable person to approach the more knowledgeable one as a student and for the more knowledgeable one to act as a teacher”. Now, in Bridgewater’s organization they have figured this out to the most granular level, because they actually assign a believability score to each participant in a discussion, in real time. This means that when the organisation needs to make important investment decisions, they will take each person’s input and put that through the filter. This may lead to a decision being voted for by a majority, but actually rejected, because the believability score of that majority was lower than the assigned knowledge, experience or background of the minority. That’s pretty powerful stuff. When two people believe opposing things, chances are that one of them is wrong. It pays to find out if that someone is you. holding wrong opinions in one’s head and making bad decisions based on them instead of having thoughtful disagreements is one of the greatest tragedies of mankind. That quote is from Ray Dalio, the founder and Grand Poobah at Bridgewater Associates, the largest hedge fund in the world and a successful billionaire entrepreneur. Dalio likes to develop the idea of thoughtful disagreement, in which the goal is not to convince the opposite party that you are right, but simply to find out which view is true and then what to do about it. Both parties must be motivated by a genuine fear of missing important perspectives. In such a situation it is about exploring the truth and not simply arguing. Or “winning” the argument. In reality, the winners of an argument, if there is such a thing, are those who leave the discussion having learned something. Whereas the losers are those who stubbornly cling to their thoughts, beliefs and reasoning without having given any consideration to the others’ point of view. What is interesting is that, being from a multi-cultural European background, I very frequently see how this plays out depending on the origins of the parties involved. Often, discussions get more heated with people from the south of Europe, considered more “hot-blooded”, than people from the North, more “cold-blooded”. The next time you find yourself in a discussion seemingly not leading towards agreement or resolution, consider this notion of thoughtful disagreement. Try to stand apart from the discussion. Hold you tongue and go through these 3 steps: * Listen with intent, meaning that you seek to understand the other person’s viewpoint first and foremost. * Take into consideration how believable the other person is. Find points of agreement and build on those. Determine points of disagreement and focus on clarifying them. * Stay open to the

notion that if the 2 ideas are opposing, and one of them could be wrong, there is actually a possibility the person having it wrong is you. You might also consider sharing this methodology with the "opposing" party and see if that improves the quality of the exchange. The goal should not be to bludgeon the other into accepting your views, but to leave the disagreement smarter than when you started and that this leads to improved decision making and a harmonious conclusion. – CNBC: [Ray Dalio says 'greatest tragedy of mankind' is people clinging to wrong opinions](https://www.cnbc.com/2017/09/12/ray-dalio-says-greatest-tragedy-of-mankind-is-people-clinging-to-wrong-opinions.html)⁷; The Startup: [How to have better discussions — the art of thoughtful disagreement](https://medium.com/swlh/how-to-improve-discussions-the-art-of-thoughtful-disagreement-24e6b838e81e)⁸; [How to make better decisions: consider Believability](https://medium.com/@pblanken/considering-believability-cf6044c55731)⁹.

I met my wife on match.com. My profile said that I'm a medical student with only one eye an awkward social manner, and 145 thousand dollars in student loans. She wrote back: You're just what I've been looking for! She meant honest. So let me be honest making money is not what I thought it would be. This business kills the part of life that is essential! The part, that has nothing to do with business. For the past two years, my insides have felt, like they're eating themselves. All the people I respected, won't talk to me anymore, except through lawyers. People want an authority to tell them how to value things, but they chose this authority not based on facts or results; they chose it because it seems authoritative. Or familiar! And I'm not, and never have been familiar. Guys I don't know how to be sarcastic. I don't know how to be funny. I don't know how to work people. I just know how to read numbers. Would I buy a car from him? No! Is he right about the mortgage market? Let's find out. Let's find out! Look, it's two very simple questions: Is there a housing bubble? And if there is: how exposed are the banks? Whoo ho ho, let's go to the press man! This is a massive story! Who wouldn't publish it? I got it, I got it! I got it, I got it. And what am I supposed to do? Want me to write a piece called: "We're all fucked!" Yes! That's a perfect title! – The Big Short: [Trailer](https://www.youtube.com/watch?v=vqgG3ITMv1Q)¹⁰: [Prologue](https://www.youtube.com/watch?v=psCF_AHuLM4)¹¹: [Burry: Met My Wife on Match.com](https://www.youtube.com/watch?v=MGZ6da5QYWw)¹²: [Burry: Just Know how to read numbers](https://www.youtube.com/watch?v=pLLgNi5UmB0)¹³; [Shorts turn the tables on Wall Street](https://www.youtube.com/watch?v=F3goSYkVPNE)¹⁴: [Burry analyzes Subprime MBS](https://www.youtube.com/watch?v=OzBI2r0Xb8)¹⁵, [The Jenga Blocks Dogshit Housing Market](https://www.youtube.com/watch?v=xbiDrzTd8fE)¹⁶: [Financial World: Ali v Foreman](https://www.youtube.com/watch?v=9partBjNn-o)¹⁷; 60 Min: Inside the 2008 Collapse: [01](https://www.youtube.com/watch?v=2sWhvOaavTQ)¹⁸:[02](https://www.youtube.com/watch?v=FMt_ZczGmEU)¹⁹:[03](https://www.youtube.com/watch?v=blq-1pLGKwc)²⁰; Bloomberg: [Burry Investing in Farmland with water, Gold](https://www.youtube.com/watch?v=9partBjNn-o)²¹.

EoP Re: Michael Burry: Nobel Risk Error; Emmanuel Macron: EU Intl Law Mistakes.

“This is very much like the bubble in synthetic asset-backed CDOs before the Great Financial Crisis in that price-setting in that market was not done by fundamental security-level analysis, but by massive capital flows based on Nobel-approved models of risk that proved to be untrue.”

– Bloomberg: [The Big Short's Michael Burry Explains Why Index Funds Are Like Subprime CDOs](#)⁴; [Big Short's Michael Burry Reveals His Picks of Undervalued Japanese Companies](#)⁵, via Zero Hedge: ["Big Short" Investor Michael Burry Explains How Index Funds Will Trigger The Next Crash](#)⁶.

We were accustomed to an international order which, since the 18th century, rested on a Western hegemony, mostly French in the 18th century, by the inspiration of the Enlightenment; then mostly British in the 19th century thanks to the Industrial Revolution and, finally, mostly American in the 20th century thanks to the 2 great conflicts and the economic and political domination of this power. Things change. And they are now deeply shaken by the mistakes of Westerners in certain crises, by the choices that have been made by Americans for several years which did not start with this administration, but which lead to revisiting certain implications in conflicts in the Middle East and elsewhere, and to rethinking a deep, diplomatic and military strategy, and sometimes elements of solidarity that we thought were intangible for eternity, even if we had constituted together in geopolitical moments that have changed. – The Saker: [President Macron's Amazing Admission](#)⁷; via [Zero Hedge](#)⁸.

Ecology of Peace Sustainable Security analysis:

Ecology of Peace Functional Interpretation of Objective Reality Transforming the World Constraints for Sincere Peaceniks / Honourable Warriors:

Ecology of Peace Radical Honoursty Factual Reality [eop-rh-fr.tygae.org.za] and EoP Scientific and Cultural Law [eop-scicultlaw.tygae.org.za] are EoP culture's functional group shared system of thought and action frame of orientation and object of inter-species relating devotion interpretation of reality for individuals whose object of devotion/values include: (i) honest – race, religious, gender and cultural – relationships; (ii) an ecological carrying capacity based perspective of observable factual social contract reality; and (iii) non-violent cooperative root cause problem solving.

* Objective Factual Reality: [1] Earth is not flat. [2] Resources are finite. [3] When humans breed or consume above ecological carrying capacity limits, it results in ecological overshoot, resource depletion and resource conflict. [4] Some of the socio-cultural and psycho-political consequences of overpopulation & consumption collision with declining resources include:

⁷ <http://thesaker.is/president-macrons-amazing-admission/>

⁸ <https://www.zerohedge.com/geopolitical/president-macrons-amazing-admission>

climate change, mass migration, poverty, slavery, unemployment, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, racial, religious, class, gender resource war conflict, militarized police, psycho-social and cultural conformity pressures on free speech, etc; inter-cultural conflict; legal, political and corporate corruption, etc. [5] The root cause of humans breeding and consuming above ecological carrying capacity limits is the 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses of the Masonic War is Peace international law social contract.

* Sincere Peacenik / Honourable Warrior: Interpretative Reality: [6] If individuals, families, tribes, races, religions, political parties, corporations and/or nations sincerely – aka ecological literacy [ego-eco-literacy.tygae.org.za] – want to (a) sustainably protect natural resources for future generations; and/or (b) reduce class, racial and/or religious local, national and international resource war conflict; and/or (c) enable honourable, transparent and humane international cooperative de-industrialization and depopulation of the planet to return to living in accordance to ecological carrying capacity limits; they should (d) cooperate [eop-cooperator.tygae.org.za] to nullify the 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses and replace them with Ecology of Peace clauses that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits; or be humanely eliminated from the planetary genepool.

Ecology of Peace Scientific Law [eop-scicultlaw⁹] refers to Procreation and Consumption below carrying capacity limits. EoP Footprint [eop-footprint¹⁰] defines how procreation and consumption carrying capacity limit is measured.

EoP Scientific and Cultural law [eop-scicultlaw¹¹] – based on EoP Footprint [eop-footprint¹²] – is the Ecology of Peace culture's answer to the EoP John Brown – how to get along without deceiving, overbreeding and overconsuming – Question: What is a Sustainable Procreation and Consumption footprint? EoP RH FR [eop-rh-fr¹³] is the recommended objective reality socio-legal cultural frame of orientation process for implementing EoP SciCult law as international law. » EoP Leg Sub: 16 May: [LJ v LS Court Filing](#)¹⁴; Notice of Motion [PDF]: Affidavit & EoP UN Res [PDF]: EoP Scientific and Cultural Law [PDF]; EoP Footprint [PDF]; EoP Radical Honoursty Factual Reality [PDF]

Imagine Ecology of Peace Sustainable Security analysis international order:

Gimbutas noted the stable – no population & economic consumption growth – Steppe Aryan population: that a low tech agrarian village founded in 8000 BC was still a low tech agrarian village in 4000BC. This also allowed them to sustainably farm the land, and live in peace. There are no steppe Aryan palaces. No harems; they didnt even have marriage, just as the Musou still today. Among whom, rape & murder are so rare they dont have words for it. – SQSwans: [Day Brown](#)¹⁵: [Proto Indo-European](#)¹⁶: [23 January 2017](#)¹⁷. » McVeigh 2020: [Return to Eden: EoP – End Civ – UN Resolution](#)¹⁸.

I imagine if the Versailles Treaty had been negotiated through an Ecology of Peace Truth and Reconciliation process, resulting in the [implementation](#)¹⁹ of an EoP international law social contract, Hitler would probably have been a happy little yeoman farmer in Austria or Germany, with Blondi and Ava, and nobody would have ever heard of him. Similarly Osama Bin Laden, Ramzi Yousef, Anders Breivik, Che Guevara, Joseph Stalin, Mao Tse Tung, Polpot, Charles Taylor, Fidel Castro, etc, etc, would probably have been happy little yeoman organic farmers in their villages in the Middle East, Asia or Latin America, etc. There would currently be less than a billion people on planet earth, all of them – of all races, genders and religions, entitled to their [responsible freedom](#)²⁰ [property ration](#)²¹ of 7.2 gha at a population of 1 billion, or 72 gha at population of 100 million as per [eco-footprint carrying capacity](#)²² [EoP Intl law](#)²³ – living in responsible freedom low tech agrarian villages and nations, as Aryans lived for thousands of years on the Steppe, or primitivist nomad homelands as Bushmen lived in the Kalahari, Chuckchi's lived in Chukotka, etc.
